

Polyluma

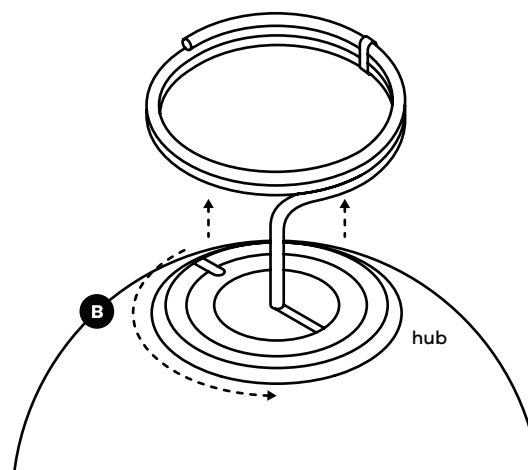

Installation Guideline

Linear

01

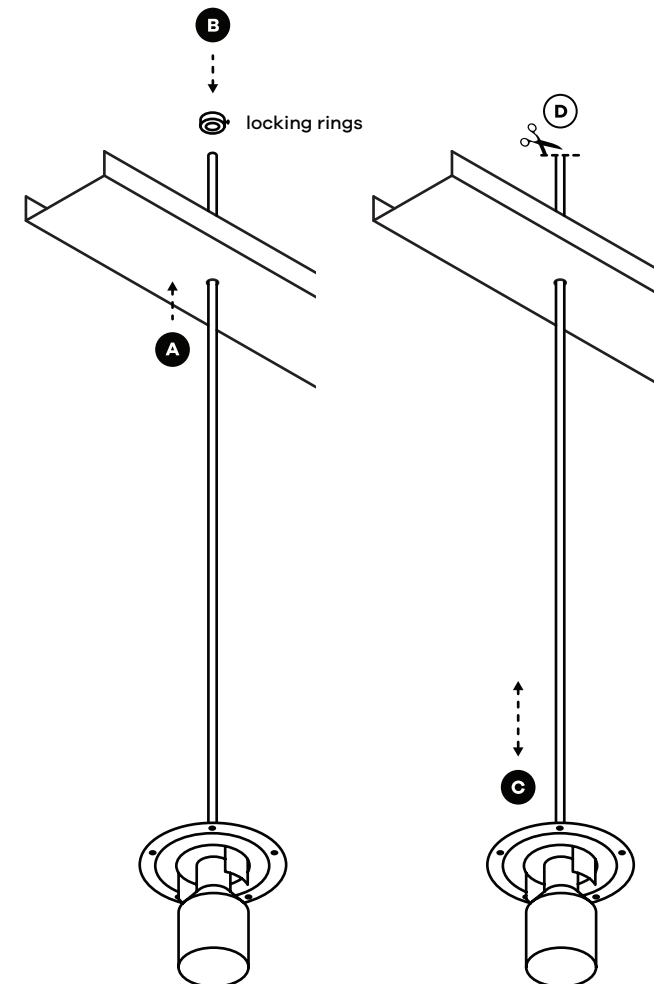

- A** Turn the canopy over and use the outer holes to mark the positions of the dowels.

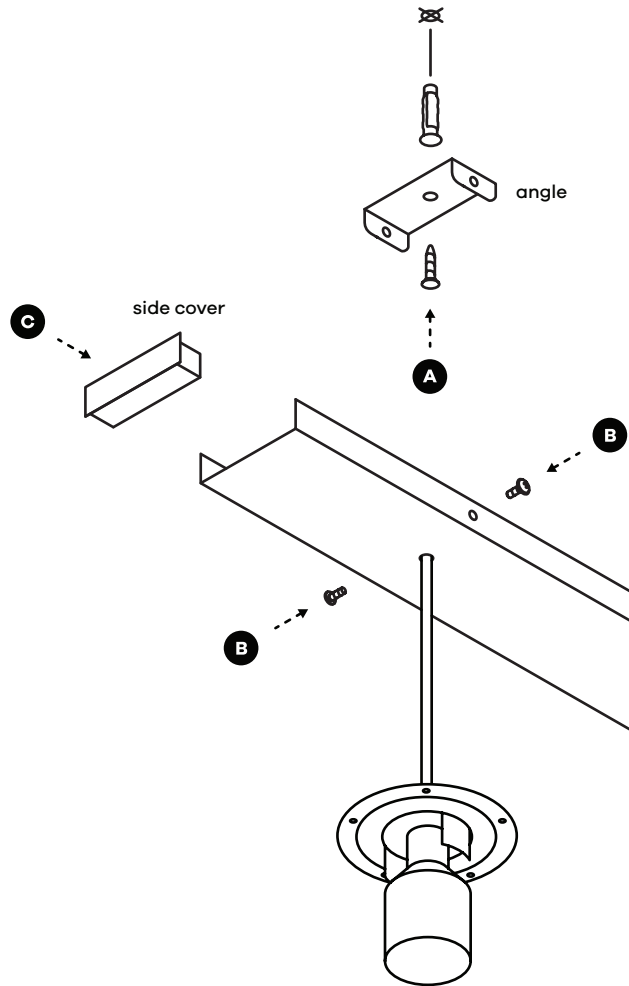

- B** Carefully take the lampshades out of the box with two hands. Separate the shades from the cables before assembly. For this, hold the shades with one hand and gently twist off the **hub** with the other hand. You can easily redock the shades later.

02

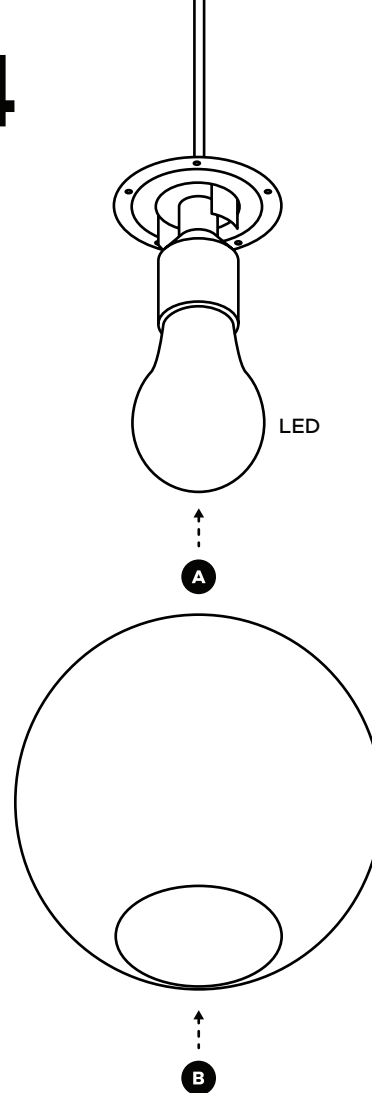

- A** Slide the cables through the holes in the **canopy**.
- B** Slide the **locking rings** over the cables.
- C** Decide at which height you want to hang the lampshades and then secure the locking rings.
- D** Optional: Shorten the cables if necessary.

03

- A** Screw the metal **angle** firmly to the ceiling - use dowels and screws suitable for your ceiling. Connect the cables to the power supply using the terminal block.
- B** Slide the canopy over the metal angle and hide excess cable in the canopy. Secure it with the side screws.
- C** Attach the **side covers**.

04

- A** Choose **LED bulbs** that match your desired lighting mood and put them into the E27 sockets.
- B** Dock the lampshades in the desired order onto the magnetic hubs.

General information

Sicherheit

Turn off the power before installation. In some countries, electrical installations must only be carried out by authorized electricians.

Leuchtmittel

Only use LED light bulbs up to 14 watts LED. Dimmable Smart Bulbs can also be used.

Reinigung

The shades can be removed for dusting. They can be cleaned under lukewarm water – optionally with a mild detergent.
